	<u>Page</u>
EXECUTIVE SUMMARY	E-1
CHAPTER 1 – INTRODUCTION	1-1
CHAPTER 2 – FLOW PROJECTIONS.....	2-1
Flow Projections	2-1
Potential for I/I Reduction.....	2-1
CHAPTER 3 – EXISTING JUANITA BAY PUMP STATION	3-1
Raw Sewage Pumping System.....	3-3
Pump Station Capacity.....	3-5
Control System.....	3-6
Primary and Standby Power System.....	3-9
Water System.....	3-10
Air System.....	3-11
Drainage System.....	3-11
HVAC System.....	3-11
Equipment Accessibility and Maintenance Considerations	3-12
Personnel Egress, Safety, and Code Issues.....	3-13
Flow Isolation and Bypassing Capabilities.....	3-14
Juanita Forcemains.....	3-14
Hydraulic Transients.....	3-17
Additional Forcemain Concerns	3-18
Conclusions	3-19
CHAPTER 4 – ALTERNATIVE EVALUATION	4-1
Pump Station Design Flows.....	4-1
Design Standards and Code Requirements	4-1
Site Constraints	4-3
Geotechnical Issues	4-3
Pump Station Alternatives	4-4
Alternative 1 – New Pump Station on Existing Site.....	4-4
Facility Description.....	4-5
Construction.....	4-5
Alternative 2 – New Pump Station on a Nearby Site.....	4-6
Facility Description.....	4-7
Construction.....	4-7

Alternative 3 – Construct A New Juanita Heights Pump Station..... 4-9

Alternative 4 – Upgrade of Existing Pump Station and Storage 4-10

 Pump Station Upgrade..... 4-10

 Alternatives for Increasing Pump Station Capacity..... 4-11

 Limitations of Upgrade..... 4-14

 Upstream Storage..... 4-15

 Construction..... 4-17

Cost Estimates..... 4-17

CHAPTER 5 – CONCLUSIONS AND RECOMMENDATIONS..... 5-1

 Comparison of Alternatives 5-1

 Recommended Project 5-3

 Appendix A – Planning Level Drawings

 Appendix B – Cost Estimates

LIST OF FIGURES

<u>Figure</u>	<u>Page</u>
Figure 1-1 – Existing Pump Station and Forcemains	1-2
Figure 3-1 – Existing Pump Station.....	3-2
Figure 3-2 – 18-Inch Forcemain Pump Curves.....	3-7
Figure 3-3 – 24-Inch Forcemain Pump Curves.....	3-8
Figure 3-4 – Emergency Generator.....	3-9
Figure 3-5 – Raw Sewage Pump Number 104.....	3-13
Figure 3-6 – Forcemain Profile.....	3-15
Figure 4-1 – Pump Station Alternative Sites	4-8
Figure 4-2 – Juanita Bay Pump Station Peak Flow Hydrograph and Storage Estimate ...	4-16

LIST OF TABLES

<u>Table</u>	<u>Page</u>
Table 1-1 – Construction Information.....	1-1
Table 2-1 – Flow Projections.....	2-1
Table 2-2 – Reduced I/I Flow Projections	2-2
Table 3-1 – Pump Parameters	3-3
Table 3-2 – Pump Suction Velocities	3-4
Table 3-3 – Horizontal Velocities In The Wetwell.....	3-4
Table 3-4 – Hydraulic Detention Times	3-5
Table 3-5 – Pump Station Capacities.....	3-6
Table 3-6 – Forcemain Velocities.....	3-16
Table 3-7 – Forcemain Valves And Associated Structures	3-16
Table 3-8 – Summary Of System Problems	3-20
Table 4-1 – Influent Sewer Storage Volume	4-5
Table 4-2 – Horizontal Velocities in the Wetwell.....	4-12
Table 4-3 – Pump Section Velocities.....	4-12
Table 4-4 – Pump Discharge Line Velocities	4-13
Table 4-5 – Pump Discharge Header Velocities.....	4-13
Table 4-6 – Summary of Design Criteria Exceeded.....	4-14
Table 4-7 – Estimated Pump Station Capital Costs (1999 Dollars).....	4-18
Table 5-1 – Comparison Of Alternatives.....	5-2
Table 5-2 – Preliminary Construction Schedule.....	5-4
